# Fact Sheet

## Stated Objective

The Dow Jones Canada Select Growth and Value Indexes are established benchmarks that have been refined for local use. The indexes present an accurate, balanced and comprehensive portrait of equity style segments, allowing investors to track and evaluate growth and value stocks separately. The indexes are constructed using a methodology that intends to correctly identify large-cap and mid-cap growth and value stocks while excluding stocks that do not clearly or consistently exhibit the traits of either category.

## Key Features

- The Select Growth and Value indexes cover only the large-cap and mid-cap portion, or about the largest 90% of stocks.
- Caps the weight of individual component stocks at 10% to promote diversification.
- The stock's style classification is determined based on a multifactor model that accounts for: Projected Price-to-Earnings Ratio (P/E), Projected Earnings Growth, Price-to-Book Ratio (P/B), Dividend Yield, Trailing P/E and Trailing Earnings Growth.
- The Dow Jones Canada Select Style Indexes<sup>SM</sup> were first calculated on November 3, 2006.
